

T8 LED Fluorescent Light Tube Wiring Diagram Ballast Removal

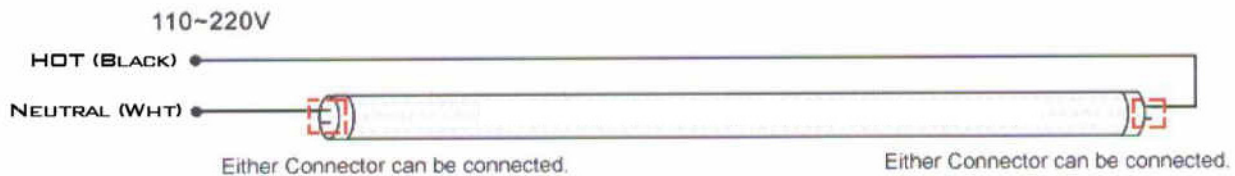

Wiring Diagram

1. Retrofit

Before:

After:

Please note that some new fixtures have the starter built into the ballast, so there may not be an external starter circuit in-line. If you still do not understand the process after reading this sheet, please do not attempt to preform this procedure yourself. Improper wiring can cause fire, electrical shorts, or other serious hazards. If not performed properly, you might also permanently damage the LED T8 tube and other surrounding light fixtures.
